L- α -甘油磷脂酰胆碱

L- α -GPC

分子式: $C_8H_{20}NO_6P$; 分子量: 257.22

Molecular formula: $C_8H_{20}NO_6P$; Molecular weight: 257.22

产品简介 / PRODUCT INTRODUCTION

L- α -甘油磷脂酰胆碱 (L- α -Glycerophosphocholine, GPC) 是人体内正常存在的水溶性小分子物质, 由胆碱、甘油、磷酸盐组成, 是机体内磷脂代谢的产物之一, 也是重要的神经传递介质乙酰胆碱 (Acetylcholine) 的生物合成前体。

L- α -GPC is a water-soluble molecule substance that normally exists in human body. It is composed of choline, glycerol and phosphate. It is one of the products of phospholipid metabolism in human body, and also an important precursor of acetylcholine biosynthesis.
