灵芝提取物

GANODERMA LUCIDUM EXTRACT

产品简介 / PRODUCT INTRODUCTION

灵芝自古被称为“仙草”，药材为多孔菌科真菌赤芝 *Ganoderma lucidum* 或紫芝 *Ganoderma sinense* 的干燥子实体。

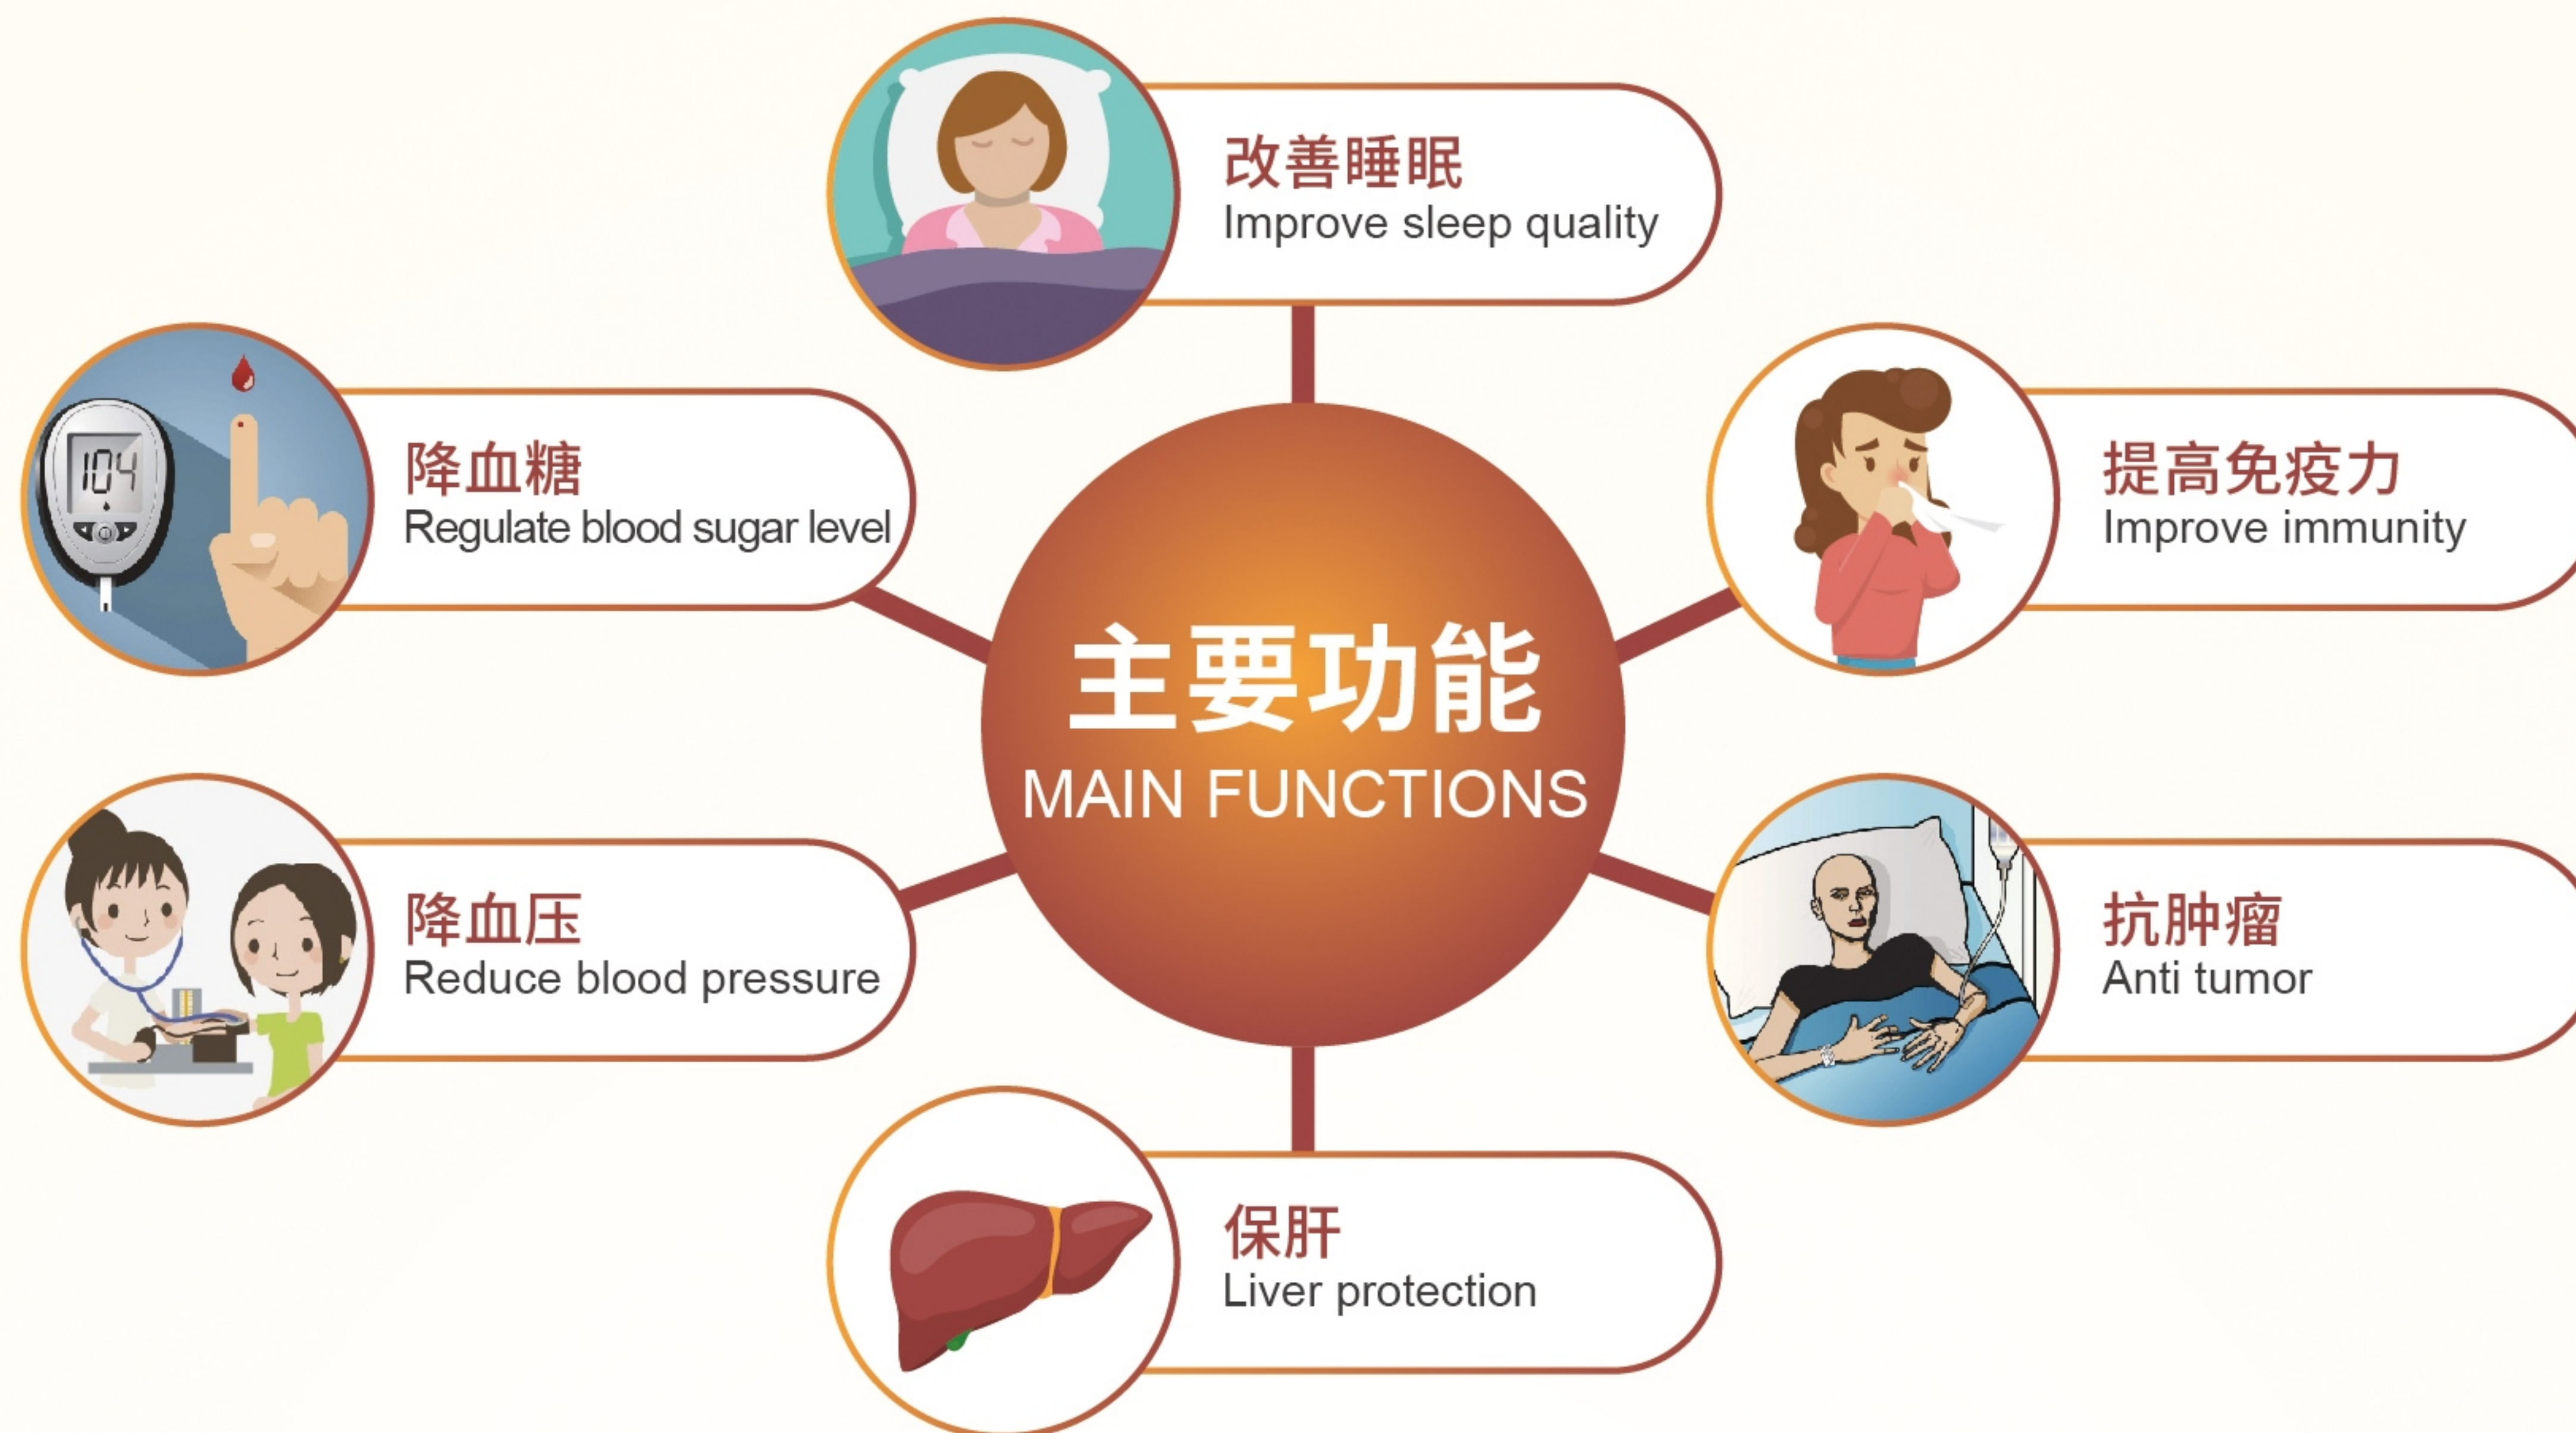

灵芝多糖包括肽多糖、杂多糖等100多种。灵芝三萜包括灵芝酸、孢子酸等。

Ganoderma lucidum has been known as "immortal grass" since ancient times, and its medicinal material is the dried fruit body of *Ganoderma lucidum* or *Ganoderma sinense*.

Ganoderma lucidum polysaccharides contain more than 100 kinds of polysaccharides, including peptide polysaccharides and heteropoly polysaccharides. *Ganoderma* triterpenes includes ganoderic acid and sporic acid, etc.

灵芝提取物

GANODERMA LUCIDUM EXTRACT

产品优势 / ADVANTAGES OF PRODUCT

01

含量检测
Content detection

灵芝三萜HPLC45% (灵芝酸A计)
Ganoderma triterpenes HPLC 45% (Ganoderma lucidum acid A)
灵芝多糖UV20% (酶解法)
Ganoderma lucidum polysaccharides UV 20% (enzymolysis approach)

02

控制限量
Control limits

灰分/重金属/塑化剂/溶剂残留
ash content/heavy metal/plasticizer/residual solvent

03

低残保证
Guarantee of low residue

符合570项农残限量
Comply with 570 limits for pesticide residues

04

道地药材
Unadulterated medicinal materials

产自龙泉/金寨
sourced from Longquan/Jinzhai

产品规格 / SPECIFICATION OF PRODUCT

品名 Product Name	限量标准 Limiting Standard	农残标准 Pesticide Residue Standard	规格 Specification
灵芝三萜提取物 Ganoderma triterpenes extract	企业标准 Enterprise standard	欧盟农残标准 EU Pesticide Residue Standard	三萜含量(HPLC)20%~45% Ganoderma triterpenes content (HPLC) 20%-45%
		USP561标准 USP561 Standard	
灵芝多糖提取物 Ganoderma polysaccharides		台湾卫福部农残标准 Taiwan Health and Welfare Ministry Standard	
		国家标准 National standard	多糖含量(UV) 20% Ganoderma lucidum polysaccharides content (UV): 20%
		USP561标准 USP561 Standard	

产能 / CAPACITY

本公司拥有灵芝专用生产线,可年产80T各种规格高质量产品。

With special production line of ganoderma lucidum, the company is able to realize an annual output of 80T in various specifications and high quality.
